

INTRODUCING V40CMBM

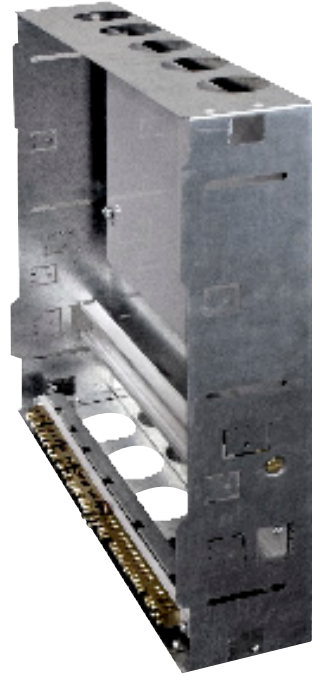

COMBINED METER BOARD
WITH METAL BASE

DEEP BASE
ASSEMBLY

EASY
INSTALLATION

R&D
RESEARCHED &
DEVELOPED IN-HOUSE

The new V40CMBM Combined Meterboard introduces a sleek small unit, perfect for apartments and small dwellings.

Using feedback from local electricians, our New Zealand based team of engineers have improved the fully plastic V40CMB with this next generation combined meterboard.

It has the same great exterior look, while packing in plenty of space for installation.

Features:

- Combined 20 way distribution & meter space (240mm H x 350mm W meter panel) in one housing.
- Base has fold out tabs to set the board at the right depth from framing to accommodate for installation with standard plasterboard.
- Fold out tabs on the inside of the base that allows the DIN rail to be mounted forward in the base when installed with an extension frame.
- Cable entry holes top & bottom are completely knocked out and supplied with open & closed bungs.
- Deep base assembly especially designed for ease of installation.
- Spacious metal base construction with aesthetically appealing plastic doors.
- Aesthetically consistent with the iconic V series switchboards.

CODE	METER PANEL	DOOR & SURROUND	BASE BOX
V40CMBM	240mm H x 350mm W	435mm H x 420mm W x 32mm D	415mm H x 390mm W x 92mm D
