

VM68 / VM68L - 68 WAY DISTRIBUTION BOARD

SAFETY

This product complies in full with AS/NZS 61439.3.

This product should be installed by a suitably qualified person in accordance with Australian and New Zealand wiring rules.

INSTALLATION PROCEDURE

This product is designed to be installed inside a wall cavity only (flush mounting). Do not surface mount.

For surface mounting, use VMCC surface mount enclosure kit in conjunction with this board.

The metal wall enclosure must be earthed. Fold out tags (x6) on the side walls of the enclosure can be folded out to set the correct height onto the studs.

Door hinge pins are easily removable and the door can be reversed so that it swings either left or right. This product is designed to be used with New Zealand and Australia's MEN system.

DO NOT install a link between the neutral bars and earth bar on circuits dedicated to RCDs. Please ensure circuits and protective devices are adequately identified during installation.

SPECIFICATIONS

Rated Operational Voltage	415V AC maximum, 50Hz
Maximum Current	100A
Rated Insulation Voltage	1000V
Short Circuit Withstand	10kA

DIMENSIONS

Cover Assembly	800 x 402 x 35mm
Base (cut out size)	753 x 355 x 93mm

WARRANTY

This product is covered by a 1 Year Vynco Warranty - proof of purchase is required. Please contact Vynco for details of returns procedure.
